

Plan a successful DB2 Information Management private training class by partnering with The Fillmore Group.

The Fillmore Group is authorized to deliver all IBM Data Servers and Data Warehousing courses. If you are interested in scheduling a class, please review the following logistics and contact us at 410-465-6335:

- Course selection and duration: Detailed course outlines are available on the IBM website at <http://www.ibm.com/training>. Review the course outline to verify that the topics meet your needs, and confirm the number of class days agrees with your class timeframe. The Fillmore Group will work with you to further tailor the course delivery to meet your students' needs, if necessary.
- Course location: The Fillmore Group can deliver classes at your location or in our Towson, Maryland classroom. The TFG classroom seats eight students. If you would like the class delivered at your location, please let us know so that we can confirm your classroom's setup and ability to access any remote systems used in the course lab exercises.
- Schedule: If you have particular dates in mind for the course, let us know as soon as you can. Our instructors often schedule their time in advance; we want every opportunity to provide you training when you want it delivered.
- Number of students: Course materials are obtained from IBM on a per student basis so the exact number of students is needed to prepare a price quote and to ensure timely delivery of materials.
- Budget: If you are working within a fixed budget for the course delivery, please tell us. We do our best to deliver valuable DB2 education at competitive prices, however there are costs that must be factored in. If we need to get creative, let's work together from the start to deliver a mutually beneficial training event.
